DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/06/2006 has been entered.

2. The Amendment filed by Applicant on 07/06/2006 has been entered.

Response to Amendment/Arguments

3. Applicant's amendment and arguments filed on 07/06/2006 have been fully considered and they are found unpersuasive.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1713

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-12 and 16-17 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Hoveyda et al., WO 02/14376 (hereinafter "Hoveyda") in view of Muhlebach et al., U.S. Patent No. 5,854,299 (hereinafter "Muhlebach"). Hoveyda teaches Ru complex of a 1,3-dimesityl-4,5-dihydroimidazol-2-ylidene and styrenyl ether ligand. See Hoveyda, Abstract; pages 2-4. Hoveyda further teaches that the Ru complexes are functional in ROMP polymerization reactions. See Hoveyda, page 7. The present invention differs from Hoveyda in that Hoveyda does not

Art Unit: 1713

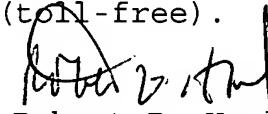

expressly teach polymeric compounds containing the Ru complex. Muhlebach teaches, in analogous art, polymeric compounds containing products of cyclic olefins and ROMP complexes. See Abstract; cols. 8-11. Muhlebach also teaches polymers having average molecular weight 500 to 2,000,000 daltons. In view of Muhlebach, one having an ordinary skill in the art would be motivated to modify Hoveyda by introducing cyclic olefins in the presence of the Ru complexes. Such modification would be obvious because one would expect that the use of Ru complexes as taught by Hoveyda would be similarly useful and applicable to the ROMP process in Muhlebach.
